AWS Cloud Practitioner

👤 PROFILE

Experience with ReactJS, NodeJS, Express, PostgreSQL, and other languages. Detail oriented and critical thinker, both qualities that were carried over from my previous career path. Prior background experience in mechanical work troubleshooting machines in a high speed machinery facility. I am looking to get my foot in the door of the technical world with a company that I could see long term growth with.

📁 EMPLOYMENT HISTORY

Freelance at Self Employed, Winston Salem

July 2021

Time spent pursuing career in development by furthering my skill set with programming. All projects below, including more, are posted on github.

Personal Portfolio - Created personal portfolio to improve my ability of self sufficient work as well as show previously completed projects. Deployed on Netlify and routed through to personal domain. HTML/CSS/ReactJS. - <https://www.iamcorywarden.com/>

Activity Tracker - Created app to track placement of runs and bike rides in local area. This uses local storage to log submissions so that they are accessible if they page is exited and revisited. Deployed on Netlify. HTML/CSS/ReactJS/Map API - <https://cwacttracker.netlify.app/>

Facescanner - Created app using Clarifai API's facial recognition feature to mark faces. This app utilizes a registration and login feature, as well as keeps count of the amount of images along with username and password submitted with a PostgreSQL database. Deployed on Heroku. HTML/CSS/ReactJS/NodeJS/PostgreSQL/Clarifai API - <https://facescanner-frontend.herokuapp.com/>

Machine Mechanic at Ardagh Group, Winston Salem

December 2018 — August 2022

- Check schedule to determine need for changeover or conversion or if scheduled maintenance is in order. Determine if schedule can be adjusted or permits time for overhaul, repair or readjustments required by equipment.
- Check machines and analyze any mechanical or operational issues.
- Make repair or overhaul as required short of machining parts. Replace worn or damaged parts. Retime machine action.
- Examine, test and measure product from assigned equipment for quality specifications, using appropriate gauges and instruments and record date.
- Read schematics, prints and exploded views of machinery and equipment. Interpret and follow procedural manuals, manufacturer's guides and operation instructions.
- Analyze spoilage as to cause and take corrective action. Analyze and record comments regarding cause of production delays on production report or trouble sheet.

Billing Support / Workforce Analyst at National General Insurance, Winston Salem

August 2014 — December 2018

- Worked daily handling billing requests as well as working with other departments (finance, legal, claims) to resolve situations or discrepancies.
- Excellent computer skills, including typing proficiency, multi-tasking between online applications, working knowledge of Microsoft products (Outlook, Excel, etc)

EDUCATION

High School Diploma, Woodland Christian School, Winston Salem

2009 — 2013

AWS Certified Cloud Practitioner

December 2021 — December 2024

Valid ID: M7CDTZBLP2B11JGT
